EndNote: Finding an Output Style not included with EndNote

If you do not see the style you want in the list of styles in EndNote's Style Manager, check here first: http://endnote.com/downloads/styles

If you still do not find it, then we do not have the output style you seek.

You might consider querying the EndNote Forum http://community.thomsonreuters.com/ts/?category.id=endnote to see if anyone else has created the style you seek, or you can add a suggestion that the style be created. Periodically we create new requested styles and post them on our website.

If you need a new style right away, you can create a new one or you can identify a similar style and modify it.
