Course Literature Policy at Linköping University Library

Effective 2006, revised May 2014

Our policy is that course literature will be available at each campus library corresponding to the course location.

For each mandatory course book there will be one course reference copy, in print, and at least one loan copy of the current edition, either in print or in electronic format.

Additional resources for further reading related to each course are available. This literature is purchased through the respective subject librarian, in consultation with students and course directors.

Regarding course and resource literature, Open Access publications and e-books are especially suitable, since they are campus independent and accessible to several readers simultaneously.

We welcome acquisition proposals or suggestions you may have!
